

## Europa Anti-Spam Appliance with Fail-over Redundant Email Server A complete Revamp

**MISSISSAUGA, Ontario, - February 14, 2009** – Jovian Technology Inc. ([www.jovianttechnology.com](http://www.jovianttechnology.com)) today announced that version 2.2 of its Europa, the anti-spam appliance with fail-over redundant email server, is now available. The new version of Europa has greatly improved usability and more added features.

### PSM Spam Filter Using Single-click Email Icon or Right-Mouse-Click Controls

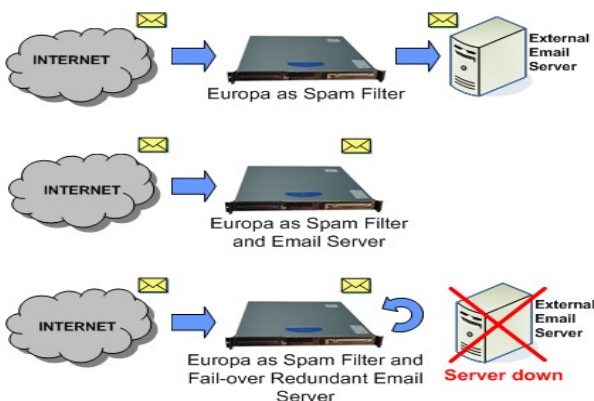

Europa now offers its high usability **Personalized Spam Management (PSM)** tools. Using either a single-click of an icon, or a right-mouse-click on the incoming email, users can add the sender's email address to their personal black/white list. Furthermore, Europa's multi-level filtering architecture automatically promotes personal black/white lists through the corporate hierarchy.

**Two methods available from Europa to provide the single-click PSM operation**

### Fail-over Redundant Email Server

Europa comes with a built-in email server. It can be easily configured as a primary or an automatic fail-over redundant email server. Europa is the most affordable email solution for business continuity.

Europa can function as:

- a) Anti-spam filter
- b) Anti-spam filter and email server
- c) Anti-spam filter and fail-over redundant email server

### **Complete Revamped GUI, Great Usability**

Europa release 2.2 uses the Yahoo! User Interface library to provide an interactive web interface for more intuitive user functions. Release 2.2 supports three different access groups, the system administrator, the domain administrator and the end user. With this unique feature, Europa provides centralized policy control, distributed policy control, or different combinations of the two. Using the centralized control, system administrators can set up central policies for the domain administrators and the end users to follow. Using the distributed control, policies can be overridden. This allows domain administrators to manage their own domains and setup their own policies. Similarly, end users can set up their own policies to fulfill their needs. This provides great flexibility in customizing policies to fit into the whole company's need while still accommodating the employees' technical skill levels.

### **More Features, More Value**

The following is a summary of added features included in Europa release 2.2:

- Basic and advanced system GUI for different company's need and employees' technical skill levels
- Domain specific features and domain administration GUI
  - Selective domain backup mechanism
  - Automatic domain-based LDAP synchronization
  - Functional management enhancement
- NLS-enabled GUI
- Outbound SMTP relay
- More trouble shooting, email archive and audit tools including,
  - Discovery manager
  - Queue manager
  - Sender IP analysis
  - Alerts and notifications
- More reports and logs

###

### **About Jovian Technology Inc.**

Jovian Technology is a Canadian company focusing on IT Infrastructure and Application products development. The company's primary product offer is Europa, the anti-spam filter appliance with fail-over redundant email server. Europa provides versatile email solutions. It can be an anti-spam filter, an email server, a failed-over redundant email server, or a combination of the above.

Our mission is to provide the Value Added Resellers (VARs) and their customers with a save-more-get-more email solution. Jovian believes that VARs have developed long term relationships with their customers. They are the trusted business/technical advisers, who can eliminate the fears, uncertainties and doubts that customers have towards IT products and services.

To achieve our mission, Jovian is committed to bringing innovative ideas and continuous improvements to our products. Since its first release, Europa has maintained a high standard towards functionality, usability, and affordability. Jovian has worked closely with our VARs to incorporate many valuable features and product enhancements. As a result, Europa continues to evolve and better serves the end customers.
